

OBSIDIAN

The nervous system

A classified command portal for the post-Order-66 hunt — tracking, planning, communication and counter-recruitment, coordinated into one organism.

The galaxy is *scattered*.

Order 66 fell. Hundreds of Jedi survive across a thousand worlds — rebuilding, recruiting, learning to vanish. The Empire has legions, but no eyes.

I.	Fragmented intelligence Reports are filed into a void. No single picture of the galaxy exists.	10 SECTORS • 0 GRID
II.	Isolated hunters Six Inquisitors, six separate hunts. No shared channel, no joint doctrine.	6 HUNTERS • 0 CHANNEL
III.	Open recruitment lanes The Order recruits through refugee networks — and nothing intercepts them.	RECRUITMENT • LIVE
IV.	No decision layer Sightings sit in ledgers while targets slip away. Intel never becomes action.	INTEL → VOID

One nervous *system*.

OBSIDIAN fuses a disorganized purge into a single hunting organism — every sector, probe and citizen becomes a sensor in the Emperor's hand.

01	Track Live radar of ten sectors, probe drops, sighting logs — one grid.	GALAXY TRACKER
02	Plan Intel escalates into dispatch. One board, from planning to containment.	OPERATIONS
03	Command Every Inquisitor on one encrypted channel, answering in character.	UPLINK
04	Disrupt Sector-wide broadcasts that starve the Order of recruits.	INTERDICTION

The window is *open*.

The brief hands us the moment: survivors scattered, Empire uncoordinated. Whoever builds the nervous system first wins the galaxy.

TAM	The Galaxy	a thousand worlds, unchecked
SAM	The Empire	ten sectors, eight legions
SOM	The Hunt	nine classified targets — now

WHY OBSIDIAN WINS

- ✓ Demoable live — judges operate it, they don't read about it
- ✓ Original — zero canon, zero templates, zero stock assets
- ✓ Complete — app, deck, film, 3D engine, design system
- ✓ Offline-first — runs anywhere, forever

Twelve modules. *One hunt.*

Every module is live and operable — this is the product, not a concept.

01 Command Deck

hero status board

02 Galaxy Tracker

radar + probe drops

03 Wanted Dossiers

9 psychoprofiled targets

04 Intelligence

probe / ISB feed

05 Operations

kanban dispatch

06 Interdiction

propaganda studio

07 Inquisitor Uplink

encrypted comms

08 Imperial Archive

7 lore documents

09 Terminal

working mainframe shell

10 Manifesto

the Emperor's case

11 Hunt Metrics

purge completion

12 Standards

in-app design system

Three minutes to *demonstrate it all.*

A nine-step demo that takes a judge from the gate to the design system — everything real, everything clickable.

1	Gate click to initialize	2	Boot typed sequence, beeps
3	Passphrase FOR THE EMPIRE	4	Command Deck hero + live HUD
5	Galaxy Tracker click a blip	6	Operations drag card to ACTIVE
7	Terminal cat targets.log	8	Standards the design system

Built, *not promised.*

12

Working modules

one login, one network

9

Original Jedi

psychoprofiled

8

3D scenes

custom raytracer

62s

Promo film

original score

Intel reports

generated live

0

External assets

everything in-house

The old way *vs. the network.*

The old Empire

- ✗ Reports vanish into ledgers
- ✗ Six hunters, six separate hunts
- ✗ Recruitment lanes wide open
- ✗ Sightings never become strikes

OBSIDIAN

- ✓ One live galactic grid
- ✓ One encrypted channel, one doctrine
- ✓ Counter-recruitment broadcasts
- ✓ Intel escalates into hunts

THE EMPIRE DOES NOT COMPETE WITH BETTER LEGIONS – IT COMPETES WITH BETTER COORDINATION

A raytracer we *wrote ourselves.*

Eight scenes from a vectorized numpy renderer built from scratch — no external 3D software, no stock renders.

SIGIL

WARSHIP

HELMET

PLANET

PROBE

THRONE

BLADE

CITADEL

-----------------------------	-----------------------	----------------------------------	------------------------------	--------------------------------

DISPLAY — PLAYFAIR DISPLAY

Order *is*
peace.

UI — INTER

Authenticate • Dispatch • Hunt

DATA — PLEX MONO

SIGHTING LOG // SECTOR 9 // 02:41:07

MOTION

Scramble-decode titles • count-up telemetry • radar sweep • WebAudio interface sounds — motion with meaning, never decoration.

VOICE

Absolute, institutional, merciless. Data before adjectives. The Empire does not explain — it commands.

Three operatives. *One doctrine.*

OPERATIVE 001

Anuj Phulera

DEVELOPER • AI • BACKEND

Builds the engine — zero-latency systems, the AI that makes the hunt computable.

OPERATIVE 002

Aarav Choudhary

VISION • MARKETING • IDEAS

Saw the decay of the old order and imagined something absolute. Engineers the narrative.

OPERATIVE 003

Jeehaan Kwatra

DESIGN • MEDIA • PITCH

Forges the aesthetic — every pixel, every frame, every blade of the sigil.

The net *expands.*

02 Probe Mesh

~~Fleet-wide probe telemetry with live alerts~~

03 Voice Command

~~Talk to the mainframe — the terminal listens~~

04 Sector Simulation

~~AI-generated Jedi behavior patterns for training~~

05 Citizen Network

~~Anonymous tip portal feeding the intelligence grid~~

TS '26 · CREATIVE PRELIMS

The hunt never *ends.*

Until the last ember is cold.
