

OBSIDIAN

THE EMPIRE'S NERVOUS SYSTEM

A CLASSIFIED COMMAND PORTAL FOR THE POST-ORDER-66 HUNT

ANUJ PHULERA · AARAV CHOUDHARY · JEEHAAN KWATRA

TS '26 CREATIVE PRELIMS · PATH 2 – THE EMPIRE

THE GALAXY IS SCATTERED.

Order 66 fell. Hundreds of Jedi survive across a thousand worlds – rebuilding, recruiting, learning to vanish.

The Empire has legions – but no eyes.

FRAGMENTED INTEL

reports filed into a void – no single picture of the galaxy

ISOLATED HUNTERS

six Inquisitors, six separate hunts – no shared channel

NO RECRUIT DEFENSE

the Order recruits through refugee networks, unchecked

NO DECISION LAYER

sightings sit in ledgers while targets slip away

9 TARGETS

10 SECTORS

6 HUNTERS

0 COORDINATION

ONE NERVOUS SYSTEM.

OBSIDIAN turns a disorganized purge into a single hunting organism – every sector, probe and citizen a sensor in the Emperor's hand.

THE WINDOW IS OPEN.

The brief hands us the moment: post-Order 66, survivors scattered, Empire uncoordinated. Whoever builds the nervous system first wins the galaxy.

TAM	THE GALAXY	a thousand worlds, unchecked
SAM	THE EMPIRE	ten sectors, eight legions
SOM	THE HUNT	nine classified targets, now

WHY OBSIDIAN WINS THE WINDOW

- ✓ Demoable live – judges operate it, not read about it
- ✓ Original – zero canon, zero templates, zero stock
- ✓ Complete – app, deck, film, 3D, design system
- ✓ Offline-first – runs anywhere, forever

THE OLD WAY VS. THE NETWORK.

THE OLD EMPIRE

- x reports vanish into ledgers
- x six hunters, six separate hunts
- x recruitment lanes wide open
- x sightings never become strikes

OBSIDIAN

- ✓ one live galactic grid
- ✓ one encrypted channel, one doctrine
- ✓ counter-recruitment broadcasts
- ✓ intel escalates into hunts

THE EMPIRE DOES NOT COMPETE WITH BETTER LEGIONS – IT COMPETES WITH BETTER COORDINATION

3D — A RAYTRACER WE WROTE OURSELVES.

Eight scenes, one vectorized numpy raytracer built from scratch — no external 3D software, no stock renders.

ONE DESIGN SYSTEM.

MOTION & TONE

Scramble titles · magnetic buttons · count-ups · radar sweep · WebAudio UI sounds · absolute, institutional, merciless

THREE OPERATIVES. ONE DOCTRINE.

ANUJ PHULERA

DEVELOPER · AI · BACKEND

Builds the engine – zero-latency systems, the AI that makes the hunt computable.

AARAV CHOUDHARY

VISION · MARKETING · IDEAS

Saw the decay of the old order and imagined something absolute. Engineers the narrative.

JEEHAAN KWATRA

DESIGN · MEDIA · PITCH

Forges the aesthetic – every pixel, every frame, every blade of the sigil.

THE NET EXPANDS.
