DESIGN PRINCIPLES

OBSIDIAN is not a dashboard. It is a piece of theater – an institutional interface that makes surveillance, order and inevitability feel tangible.

PRINCIPLE	HOW IT SHOWS UP
I. Absolute tone	Short declarative copy. Data before adjectives. The Empire does not explain – it commands.
II. Depth, not clutter	One canvas galaxy behind everything; surfaces stay flat and legible. Nothing overlaps content.
III. Ritual entry	Gate → typed boot → passphrase → welcome. Entry is a ceremony, not a login form.
IV. Every pixel intentional	Corner brackets, hairline borders, red accents used only for action and alarm.
V. Motion with meaning	Scramble text = decryption. Count-ups = live telemetry. Magnetic buttons = the interface feels alive.
VI. Original by default	Every glyph, sigil and component is designed in-house – no icon packs, no templates.

COLOR SYSTEM

Obsidian black carries the void; imperial red is reserved for action, alarm and the hunt itself.

// MICROCOPY & FEEDBACK

Every action answers: escalate → "REPORT ESCALATED – OPERATION CREATED"; transmit → "TRANSMISSION SENT – SECTOR TORVANE NOW RECEIVING"; drag → "OPERATION MOVED TO ACTIVE". Failure is recorded in-universe: "ACCESS DENIED – INCIDENT LOGGED".

// ACCESSIBILITY

AA contrast on all body text · keyboard-operable nav and forms · focus states via red border · custom cursor disabled under 768px · reduced-motion respected for the canvas.
